GENERAL INFORMATION

Product Code	ADS-MBT-649905
Brand	Artize
Colour	Botticino Classico Biege
Type	Table Top Basin
Material	Marble Stone -Italian Botticino Marble

PRODUCT SPECIFICATION

Product Dimension	480x480x150 mm
Basin Inner Dimension	448x448x125 mm
Product Net Weight	21 kg.
Product Gross Weight	24 kg.
Packaging Dimension	600x600x230 mm
Outlet	Vertical
Technical Details:	Internal diameter of outlet hole dia. $\varnothing 45 \pm 2/-1$ mm
	Horizontal distance between the Bowl edge and the centre line of the waste outlet hole ≤ 240 mm

PRODUCT FEATURES

Product Features	Botticino Marble is purely Italian Marble quarried Since antiquity. Becauseof its white veins and brown veins which forms patterns in its own, itsdifferent from other beige Marble. Each stone surface has its own distinct characteristics. This individuality makes each stone fixture a unique and one in a million. Stone is a natural material; thus its color, veins and shades can vary from one piece to another. Basins are made from single block of marble so no cut & joint in basin. Each basin is hand crafted basin. Every basin is unique in its own pattern and texture.

CARE AND CLEANING GUIDELINES

Stone is a natural material; thus, its color, veins and shades can vary from one piece to another.
If staining occurs, only use a light and less intense stain remover specifically formulated for natural stone.
This Stone wash basin has been treated with AKEMI Nano, a natural-looking and penetrating sealer. Reapplication of AKEMI Nano or a similar sealer twice a year may be required to prevent and protect the finish of your wash basin.
One of the basic properties of natural stone is that it may change color over a period of time if exposed to direct sunlight.
Keep chemicals such as bleach, fingernail polish remover, and fingernail polish, oils, Harpic, etc. away from your basin to prevent staining or damage
Residues of toiletries such as liquid soaps, shower gels, shampoos, hair dyes, perfumes, lipstick, aftershave, and nail varnish if not wiped up immediately can also cause damage to the surface of the wash basin. This can allow the acids to react with calcium carbonate in the stone and can create permanent markings.
Each stone surface has its own distinct characteristics. This individuality makes each stone fixture a unique and one in a million.
The stone basins are to be cleaned using normal, neutral detergents with low alkaline contents on daily basis
Do not use strong, abrasive, concentrated products, or cleaning agents such as ammonia, bleach, anti-lime, acids, abrasives, degreasers, or alcohol or even those homemade remedies such as lemon and vinegar, as these will impact product finish.
We strongly recommend not using bristle brushes, scrubbing pads, steel wool, or abrasive cleaners as these are harsh on materials
Stone basins are not resistant to impact
Application of a stone sealer will help make natural stone surfaces less porous and more resistant to stains. The sealer is stain resistant but not stains proof, hence is recommended to maintain your wash basin for long lasting aesthetic finish, hence a stone sealer can be applied on the surface.
